

Yerik Kassym

Senior Business Analyst | CDP, Customer Data & Platform Integrations

Almaty, Kazakhstan · yerik.kassym@gmail.com · linkedin.com/in/kassymyerik · Remote · Part-time / contract

SUMMARY

Senior Business Analyst with 4+ years turning marketing and customer-experience needs into technical requirements for CDPs, messaging platforms, and multi-system integrations. Own the path from BRD to schemas, API documentation, data-flow maps, and pre-business testing. Hands-on with customer-data platforms (Emarsys; currently driving a CDP as the consolidated customer-data layer), REST/SOAP APIs, Postman, and channel implementations (email, WhatsApp, notifications). Partner with business, marketing, and engineering from discovery through go-live.

CORE SKILLS

CDP & customer data: CDP requirements · Customer-data layer / profile flows · Emarsys · Schemas & data dictionaries · Event and channel tracking · Lifecycle messaging

Integrations & APIs: REST · SOAP · API documentation · Postman · Source-to-target data flows · CRM / marketing / CX system integrations

Business analysis: BRD review & completion · Technical & functional requirements · Process / data-flow maps · Acceptance criteria · Pre-business / UAT testing

Channels & platforms: Email & notifications · Infobip · SendGrid · 15 Below · WhatsApp · Help center · Chatbot · Zendesk → Q19

EXPERIENCE

Air Astana — Almaty, Kazakhstan

Senior Business Analyst (Apr 2024 – Present) · **Senior Analyst, Digital Business** (Jun 2025 – Present) · **Business Application Analyst** (Oct 2021 – Present)

CDP, customer data & marketing channels

- Driving CDP as the consolidated customer-data layer: technical requirements for how surrounding systems feed customer profiles and operational data into one platform.
- Previously supported Emarsys; currently own messaging/notification channel requirements and integrations via 15 Below, Infobip, and SendGrid (email, WhatsApp, and related lifecycle communications).
- Map end-to-end customer and operational data flows across CRM/CX, loyalty (FFP), and marketing/messaging platforms; produce schemas, diagrams, and integration requirements.
- Lead Zendesk → Q19 channel migration (help center, telephony, WhatsApp, chatbot)—current-state maps, requirements, and pre-business validation before go-live.

Requirements, APIs & delivery

- Review and complete BRDs with business/marketing stakeholders; translate initiatives into technical requirements, acceptance criteria, and implementation-ready documentation.
- Author REST/SOAP API documentation and integration specs; maintain Postman collections for endpoint validation and analysis.
- Run pre-business tests before handoff to business sign-off; identify gaps, data-quality risks, and integration constraints early.
- Partner with engineering, vendors, and business teams on in-house builds and third-party platforms from discovery through go-live.

Solution Engineer — Adikteev, Paris, France

2020 – Jul 2023

- Worked in a digital advertising / customer-engagement product environment; bridged commercial and engineering stakeholders to scope solutions and align delivery with customer outcomes.
- Translated business and campaign goals into functional/technical next steps—foundation for later BA work on platforms, APIs, and customer data.

Technical Lead Engineer — Nommi, Almaty, Kazakhstan

Aug 2018 – Aug 2019

- Led technical delivery collaboration; coordinated priorities and communicated feasibility trade-offs to stakeholders.

Project Engineer — Huawei Kazakhstan, Almaty

Apr 2017 – Nov 2017

- Supported project execution and technical coordination under timeline and quality constraints.

EDUCATION

M.S., Computer Science (Communication Networks) — Université Paris-Saclay · 2019 – 2020

M.S., Information Systems — Kazakh-British Technical University · 2018 – 2019

B.S., Information Systems — Suleyman Demirel University · 2013 – 2017
