

Yerik Kassym

Senior Business Analyst | Integrations, APIs & Digital Platforms

Almaty, Kazakhstan · yerik.kassym@gmail.com · linkedin.com/in/kassymyerik · Open to remote

SUMMARY

Senior Business Analyst with 4+ years delivering requirements and technical analysis for airline digital platforms, integrations, and customer-facing services. Own the bridge from BRD to technical requirements, API documentation, endpoint validation, and pre-business testing. Hands-on with REST/SOAP, Postman, multi-system integrations (CDP, Amadeus, messaging providers), and channel implementations (help center, telephony, WhatsApp, chatbot). Partner with business and engineering on in-house builds and third-party platforms from discovery through go-live—including workflows, schemas, and AI-assisted automation.

CORE SKILLS

Business & requirements: BRD review & completion · Technical requirements · Workflow analysis · Schemas · Stakeholder enablement · Pre-business / UAT testing

Integrations & APIs: REST · SOAP · API documentation · Postman · Endpoint testing · Integration requirements · CDP · Amadeus

Channels & platforms: Messaging & notifications · 15 Below · Infobip · SendGrid · Emarsys / CDP · Zendesk → Q19 · Help center · Telephony · WhatsApp · Chatbot · FFP / Grafty

Delivery: In-house development requirements · Implementation support · Integration ownership · Process automation / AI · Business-engineering collaboration

EXPERIENCE

Air Astana — Almaty, Kazakhstan

Senior Business Analyst (Apr 2024 – Present) · **Senior Analyst, Digital Business** (Jun 2025 – Present) · **Business Application Analyst** (Oct 2021 – Present)

Requirements & delivery

- Review and complete BRDs with the business team; clarify scope, workflows, and acceptance expectations before technical design.
- Produce technical requirements and implementation-ready documentation for in-house development and vendor/platform work.
- Analyze end-to-end workflows, create schemas/diagrams, and help business stakeholders structure accurate BRDs.
- Support implementation from requirements through technical validation; run pre-business tests before handoff to business sign-off.

APIs, integrations & platforms

- Author API technical documentation and integration requirements for REST and SOAP; maintain Postman collections for endpoint validation and analysis.
- Own technical requirements and analysis for multi-system integrations, including CDP and Amadeus, ensuring customer/operational data flows across platforms.
- Delivered/supported FFP (query system) and Grafty platform work involving extensive integrations.
- Responsible for messaging/notifications: channel implementation via 15 Below, Infobip, and SendGrid; previously Emarsys; currently driving CDP as the consolidated customer-data layer.
- Leading channel migration from Zendesk to Q19—help center, telephony, WhatsApp, chatbot, and related service channels.
- Contributing to AI-assisted process automation to reduce manual effort and improve operational workflows.

Solution Engineer — Adikteev, Paris, France

2020 – Jul 2023

- Bridged commercial and engineering stakeholders to scope solutions, clarify requirements, and align technical delivery with customer outcomes.
- Translated business goals into actionable functional/technical next steps in a product/platform environment.

Technical Lead Engineer — Nommi, Almaty, Kazakhstan

Aug 2018 – Aug 2019

- Led technical delivery collaboration; coordinated priorities and communicated feasibility trade-offs to stakeholders.

Project Engineer — Huawei Kazakhstan, Almaty

Apr 2017 – Nov 2017

- Supported project execution and technical coordination under timeline and quality constraints.

EDUCATION

M.S., Computer Science (Communication Networks) — Université Paris-Saclay · 2019 – 2020

M.S., Information Systems — Kazakh-British Technical University · 2018 – 2019

B.S., Information Systems — Suleyman Demirel University · 2013 – 2017
